Hands-on STEM Projects for Middle and High School Students

Karen Iglesia
Iglesia Educational Centers
Technology Education

✓Ms. Iglesia will share her insights regarding providing effective academic programming in the areas of Science and Math, as well as the need to successfully engage more middle and high school students in these areas. Practical hands-on learning activities, using readily available, inexpensive materials will be demonstrated, and participants will experience first-hand some of the fun and engaging learning projects that Ms. Inglesia uses to actively involve students in their own learning process.
