Using Creative Problem-solving to Increase Group Outcomes

Sandra Fink
RCSD, Retired, ThinkFink Solutions

✓Why is it that some groups can move forward with finding solutions to a problem and others seem to go round and round in circles? Creative problem solving preferences may be the key factor that allows a group/team to work together and be successful or cause major delays and distractions. Come and learn through hands-on experiences about the breakthrough thinking process. Learn how to spot potential team conflicts and possible solutions. This information is useful in classroom and work environments.
