Enviroboxes: Integrating All Subjects Through Science

Lynn Gatto
RCSD, Retired
Science

✓Is Kentucky Bluegrass Blue? Will Hawaiian coral soften in salt water? These are just a few of the questions children asked and investigated after opening the five enviroboxes they received from all over the United States. This workshop is designed to share with the participants a unique project based in science that will also integrate math, language arts, technology and social studies standards. Participants will learn how to plan and prepare the enviroboxes, develop inquiry based investigations using their contents and connect other disciplines in a meaningful and comprehensive way. Teachers will be eager to implement the Envirobox Project after exploring how effective it is in engaging and motivating students in authentic learning!
